A SMALL LESSON IN POWER

The RS badge is reserved for the best of the best and this car is no exception. All-Wheel Drive with Dynamic Torque Vectoring delivers new levels of handling capability and driver enjoyment, while the 2.3L EcoBoost Engine outputs up to 257kW of power. Add sports tuned suspension, Brembo brakes and antiroll bars and you've got a performance machine that puts its peers to shame.

Driver Select Mode.

The Focus RS is full of cutting edge performance technologies including Drive Modes and Launch Control. With four selectable Drive Modes geared for optimum performance on the road or circuit, the extreme driving capabilities of the RS are easy to unleash.

Take control.

Dive in and out of corners with agility and precision. The Focus RS utilises the Ford Performance All Wheel Drive system bringing you unprecedented levels of handling, traction and grip.

Focus RS Features

Brute Power.

The Focus RS redefines power. The specially designed 2.3L EcoBoost engine outputs up to 257kW of power and 440Nm of torque, giving you performance that's truly next level.

Just say the word.

Access your mobile, your music, satellite navigation and even change the cabin temperature without touching a dial thanks to SYNC™ 2. The intuitive voice controlled system lets you stay focused on what's important. Your drive. See all your drive information, entertainment options and climate control in stunning with the 8" full colour touchscreen.

RECARO® Sport Seats.

Strap yourself in. Sporting the lighter racing shell seats from the world-famous RECARO® brand, drivers will always feel connected to the RS.

Superior Design.

When it comes to the design of the Focus RS, every detail has a purpose. Careful aerodynamic optimization of the front splitter, rear spoiler and underbody eliminates lift forces. The striking, angular lines deliver balanced performance with zero lift front and rear, for ultimate high-octane handling.

Optional Performance Wheel Pack.

The high-performance lightweight 19" forged design wheels, finished in low-gloss black, offer enhanced strength and impact resistance with a weight saving of 600g per wheel. Wrapped in Michelin Pilot Cup Sport 2 tyres.

Bi-Xenon Headlamps.

The Bi-Xenon Headlamps not only automatically turn themselves on and off with changes in natural light, they also help you see around corners. Standard headlights are usually fixed on one spot, but the Bi-Xenon lamps change the beam's level and bend around corners so they're always on the road.
